He was an outsider on the make. Review Text "Great discoveries require leadership, but that leadership is as often flawed as it is highly skilled.

Once it appears, the flood gates open and new fields emerge. His principal areas of research are advanced EVA systems, space radiation protection, management of space science projects, and space systems architecture. Civility and savagery represented more than categories to give shape to a figurative world.

The effort cost the lives of nearly half the crew and crippled the survivors who had any relevant experience.
