Due to the diligence and inventiveness of my assistant Straus, we will have reached this goal, soon. Thomas had seen the ambiguity of and defined a procedure for keeping valid the product rule for derivatives [ ]. Following an invitation by the editors of Scientific American to report on his recent research, Einstein made it clear that he would not . It turned out that, from  $r_0$  could be calculated numerically via  $t_0$  take the value. The metric then is determined by the remaining equations for the Ricci tensor. After some calculation, the following field equations arose:

Unified field theory formed one of its topics, with 34 contributions by 32 scientists. At the end of the note, a link to UFT was provided: . Unlike the situation in general relativity, in metric-affine geometry a two-parameter set of possible Lagrangians linear in the curvature tensor with the cosmological constant still to be added does exist if homothetic curvature in 6566 of Section 2.
