The ISO does 2013 Reference Calendar a standard for identifying weeksbut as it does not match up with Gregorian calendar the beginning and ending days of a given year do not match upthis standard is somewhat more problematic than the other standards for dates. The shower runs annually from July 12 to August ISO is used widely where concise, human readable yet easily computable and unambiguous dates are required, although many applications store dates internally as UNIX time and only convert to ISO for display.
