Yuanxin Amy Yang Alcocer Amy has a master's degree in secondary education and has taught math at a public charter high school. This is equal to $a^4 + 4a^3b + 6a^2b^2 + 4ab^3 + b^4$. I think you see a pattern here, plus 4a times b to the 3rd power plus b to the 4th power, plus b to the 4th power. Step 5 Expand the coefficient.

Binomial theorem, it tells us that if we have a binomial, and I'll just stick with Intro to the Binomial Theorem. Learn how you can use Pascal's triangle to help you to easily expand a binomial.
