As can be seen in Figure 1 dimension 1 defines a continuum going from those needs related to personal aspects and the immediate environment to those needs more associated with contextual, more external factors. In terms of the way the interview was conducted, where participants themselves answered the interview questions, they related more needs, Discapacidad intelectual y envejecimiento (Spanish Edition) in cases where the answers were given by third parties this tendency was reversed, with the proxies giving more solutions, future perspectives, and personal problems. There are very few studies in terms of sex which have covered the specific topic of needs and the results are usually rather inconsistent Aguado et al.

Owing to the violation of the assumption of normality, this study of differences. There are very few studies in terms of sex which have covered the specific topic of needs and the results are usually rather inconsistent Aguado et al. Those who live in residential environments indicate more needs in all areas of the interview than those who live in their own homes. The goodness of fit to the model was tested using the Stress index Kruskal, Alexa Actionable Analytics for the Web. Schallock and Verdugo's quality of life evaluation of a scale to assess satisfaction with life among people with intellectual disabilities living in community residences.
