Depressive symptoms in BPD in the absence of major depression
Depressive symptoms that occur as part of BPD are usually transient and related to interpersonal stress eg, after an event arousing feelings of rejection. This article has no associated abstract.

Therefore, family intervention must be undertaken with care because of the
There is little evidence that electroconvulsive therapy ECT is beneficial for treating depression in patients with BPD. This paradoxical style of interaction might be well explained by the presence of a parent with BPD. Apfelbaum S, Gagliosi P. Antisocial and borderline personality disorders revisited. Contrary to the legend of Narcissus, this Greek boy fell in love with his own reflection in a pond. Empirically validated psychotherapies for BPD share common features that are applicable in all treatment settings where patients with BPD are likely to present, including primary care.
