Vulnerability to the disorder appears to be inherited in the form of a tempestuous temperament, although early caretaking in some way seems to activate it. Sufferers swing from happiness to despair to fury, often in minutes, and each feeling is vastly disproportionate to its trigger. The parental role is complex, says Gunderson. The urge was to curl up in the fetal position and cry until I was so exhausted that I wanted to sleep. The therapy aims first to diminish suicidal behavior, then to impart such basic behavioral skills as emotion regulation and distress tolerance. This article is not an endorsement, but a review. With treatment, symptoms like suicide attempts and cutting remit.
