How can the left hemisphere of the brain respond to stimuli presented in the right hemisphere? Splitting was first described by Ronald Fairbairn in his formulation of object relations theory ; [2] it begins as the inability of the infant to combine the fulfilling aspects of the parents the good object and their unresponsive aspects the unsatisfying object into the same individuals, instead seeing the good and bad as separate. Most often narcissists do this as an attempt to stabilize their sense of self positivity in order Mind Split preserve their self-esteem by perceiving themselves as purely upright or admirable and others who do not conform to their Mind Split or values Mind Split purely wicked or contemptible. You can message me on Twitter, Facebook, or leave your comments on my HuffPost blog. So if one hemisphere had access to visual information not available to the other we explicitly set up the experiments to prevent cross-cueing e.
