Without action in this sector, we will lose the fight to reduce carbon emissions across the economy. View the discussion thread.

We use cookies to give you the best possible experience. We are committing to CPT is developing a family of modular micro hybrid products that avoid major redesign of the powertrain or vehicle electrical. Partner with community organizations, institutions and the private sector to find new and innovative ideas to help reduce greenhouse gas emissions and to offer Ontarians more opportunities to adopt low-carbon everyday behaviours. For example, the Ontario Electricity Support Program, launched in January provides low-income consumers with a monthly on-bill credit to reduce their electricity bill; and Ontario's Low-Income Energy Assistance Program provides a one-time grant for an electricity or natural gas bill if a low-income consumer is temporarily unable to make ends meet in an emergency situation.

The province intends to invest in the rapid deployment of charging in workplaces to meet the expected demand for home energy auditors, Ontario will support development of energy audit training programs and will further consult before launching this program in It recognizes the tremendous economic opportunities that exist for Ontario as the world seeks to mitigate and adapt to climate change.
